

**SSC** North America

SSC North America is a manufacturer of low volume, ultra-high performance supercars located in West Richland, WA. We design and build world record level vehicles, are currently working on a new model and are moving into a new facility, allowing growth within our engineering staff. SSC is a small company with an exciting product and a fast-paced work environment, and is uniquely placed to offer work on such influential projects while maintaining an open and efficient family owned atmosphere.

SSC is currently seeking an experienced engine calibration engineer to join our development team. Applicants must have a minimum of 2 years gasoline engine calibration experience, including emissions and/or On-Board Diagnostics (OBD) calibration. Applicants should also be experienced with both chassis and engine dynamometer based performance calibration of forced induction engines. Familiarity with engine control strategies is a must, as the calibration department will work directly with ECU suppliers to develop ECU functionality. This position may involve up to 50% travel to support calibration activities at emissions test locations and on customer vehicles. Applicants should be comfortable working with high-profile customers and government and test lab personnel. Must be highly motivated and capable of working independently.

This is a full time position which will be based in West Richland, WA. Relocation assistance is available.

Eligibility requirements:

BS or higher degree in mechanical or automotive engineering, or equivalent credentials

2+ years engine calibration experience

Understanding of gasoline combustion and emissions production

Familiarity with emissions controls including catalysts, sensors, actuators, and evaporative emissions

Must have experience with multiple ECU and calibration platforms

Excellent mechanical aptitude is required, including troubleshooting ability

Must be capable of interfacing with suppliers and customers

Should be able to travel up to 50%, including occasional multi-week and international trips

Must be a US citizen or currently authorized to work in the US

Previous racing or high performance vehicle development experience in a professional or hobby environment is a plus. Track support or race car prep experience, including chassis set-up, is beneficial, as is high performance driving ability.
